

Meet the Standox Color and Technical Service Team

The Standox Color and Technical Service Center is available to support you. The center is easy to use and a free service.

Standex color and technical experts are ready to answer your questions and troubleshoot problems. They can answer questions on color retrieval, toner characteristics, mixing machine configurations, color names, paint codes, interior colors and much more. The Color and Technical Service Staff is also able to provide regulatory guidance.

The service center maintains a patented historical database (STARS®) that tracks all calls that have been received since 1995. STARS® supplies the service center team with access to all historical research completed in the department over the last 10 years instantly, which helps provide you with a fast and accurate answer. If you have called in the past 10 years looking for a color formula and you need that formula again, we've got it!

Hours of operation are Monday to Friday, 8 a.m. to 6 p.m., EST. Reach the team at 1.800.551.9296, prompt #4.

Amanda Duke

Amanda started her career with DuPont in November 2003, and is the latest member to join the Standox Color & Technical Services staff. She's instrumental in MSDS and TDS production and color tools development. In addition, her data work includes uploading

material to www.standexna.com and managing the Standox sales document database.

Ron LeHue

Ron started his career with Standox in May 1992 working in the Color Service department. He has a deep understanding of the auto body industry gained by working in a body shop back in the late 70s, working in a paint factory, and doing custom

paintwork on bikes. Ron's responsibilities include technical support, backup for color support, and product issues. As a member of the Plymouth, MI office SHE Team, he also puts on monthly safety meetings and is responsible for site safety inspections.

Peter Gregory

Peter started his career with Standox in August 2002. With past experience in auto detailing, Peter knows about caring for your automotive finish. Working mainly in color support, Peter does backup on the technical side and is responsible for weather and fire safety as part of the Plymouth, MI office SHE

team. He also brings a wealth of background in computers and internal support. If you call during college football season, mention the Michigan Wolverines and see what kind of response you get. Falling back on his Coast Guard motto, "Semper Paratus," Peter is always prepared to help our customers.
